ABM RESEARCH SAMPLE SNAPSHOT

Enterprise account intelligence & buying committee mapping

ILLUSTRATIVE TEMPLATE — NOT A COMPLETED RESEARCH DELIVERABLE
This document uses generic examples and placeholders. It is not evidence of research completed for a named client or of six account-specific findings.

Prepared for	[Client/Prospect Name] — placeholder	**Date**	Template example
Snapshot type	Salesforce-native B2B SaaS / Enterprise (illustrative)	**Scope**	Account context + buying roles

01 · Account overview

- **Company:** [Target Account Name]
- **Industry:** [Enterprise SaaS / Industrial Automation / Healthcare Technology]
- **HQ region:** [North America / EMEA / APAC]
- **Technology signal:** Salesforce-native stack, e.g., CPQ, Revenue Cloud or MuleSoft (example only)
- **ICP fit:** [High / Medium / Low — supported by documented criteria]

02 · Example account comparison

Category	Illustrative example A	Illustrative example B
Company type	Series C SaaS provider	Fortune 500 industrial conglomerate
Revenue range	$50M–$100M ARR (example)	$12B+ annual revenue (example)
Key market	North America (US & Canada)	EMEA (Europe, Middle East & Africa)
Recent signal	Announced new AI partnership (example only)	Appointed a new CRO (example only)
Technology signal	Salesforce-native CPQ + Revenue Cloud (example)	Proprietary DCS + AVEVA (example)
Opportunity hypothesis	Potential to reduce manual quote-to-cash work through RevOps automation	Potential vendor-lock-in concern; validate against public evidence
Possible messaging angle	Explore workflow efficiency and Salesforce automation	Explore flexibility and integration needs

Evidence discipline: every signal, technology claim and company fact in a real engagement should be linked to a public source and dated. Hypotheses must be labelled as hypotheses, not facts.

03 · Buying committee map

Use role-level mapping first. Add a real person only after their current role and relevance have been verified from a reliable public source.

Role	Persona / title placeholder	Decision impact
Economic buyer	[Name] — [Title, e.g., CFO / VP RevOps]	Budget owner; evaluates ROI and total cost of ownership.
Champion	[Name] — [Title, e.g., VP of Sales]	Internal advocate; builds alignment with the economic buyer.
Technical evaluator	[Name] — [Title, e.g., CTO / Head of IT]	Evaluates integrations, security and scalability; may veto the purchase.
Influencer / end user	[Name] — [Title, e.g., Sales Operations Manager]	Uses the solution day-to-day and influences adoption.

04 · Research workflow

1. ICP definition	Fit signals, market and account criteria.
2. Target-account research	Company context, business model and technology evidence.
3. Buying committee mapping	Economic, technical, champion and user roles.
4. Data-quality review	Human review for relevance, source quality and consistency.
5. Sales handoff	Account brief, confidence labels and practical next action.

05 · Actionable summary

Primary opportunity	[State the best-supported opportunity hypothesis]
Recommended messaging	[Tie a relevant message to observed evidence; do not present an unverified hypothesis as fact]
Next step	[Validate the highest-impact unknown, or prepare a tailored outreach angle]
Confidence	[High / Medium / Low, with a short reason and evidence gaps]
Recommendation	[PURSUE / MONITOR / AVOID — only after the evidence review]

Public-safe note: this template intentionally contains placeholders and illustrative examples. A completed paid deliverable should replace them with researched accounts, dated source links, verified role mapping, confidence labels and a clear recommendation. Do not use this template as evidence of client outcomes.
